# AN-HENG (ANSON) CHEN

Taipei, Taiwan | +886 908-898-078 | anson.aries@gmail.com

## EDUCATION

**National Taiwan University (NTU), College of Management** Expected Jun 2027

B.B.A. in Finance; Double Major in Civil Engineering Cumulative GPA: 4.03 / 4.3

Finance Honors Program (with an undergrad thesis); 3.88 / 4.0

**Languages:** native Mandarin; fluent English; basic Thai **Test Scores:** TOEIC 940; IELTS Overall 7.0 – (R8.5, L7.5, W6.5, S6)

**Graduate Admission:** Accepted an offer for the NUS M.Sc. in Data Science and Machine Learning, commencing Aug 2027

**Research Interests:** Machine Learning, Applied Econometrics, Financial Data Science, Risk Prediction, and Reliable AI

## RELEVANT COURSEWORK

| | |
|---|---|
| A+ in | Statistics, Introductory Econometrics, Linear Algebra, Intro to Finance Research, General Physics, Investments, Python Programming, Visualization and Modern Data Science, , Financial Statement Analysis, etc. |
| A in | Intro to Machine Learning and Deep Learning, Auctions in Finance, Political Science, etc. |

## RESEARCH & QUANTITATIVE PROJECTS

**Credit Risk Analysis and Corporate Financial Distress Prediction** Grade: A

*Course Project, Data Analysis and Machine Learning with Python* *# Feature Engineering # Logistic Regression # Random Forest*

- Built a company-month machine learning pipeline using 1m+ CRSP firm-month observations from 2016–2025 to predict financial distress proxy events within the next 12 months
- Engineered market-based risk features, including momentum, volatility, downside risk, liquidity, trading volume, price level, and firm size
- Compared logistic regression and random forest models; the random forest achieved a test ROC-AUC of 0.895, with the top 10% risk bucket showing a 14.0% event rate

**Relative Pricing of Islamic and Conventional Fixed-Income Securities: Evidence from Malaysian Sovereign Sukuk** Grade: A+

*Term Paper, Intro to Finance Research* *Supervisor: Professor Yao-Min Chiang*

*Currently being developed into an undergraduate honors thesis* *# Statistics # Regressions # HAC Corrections*

- Examined yield differentials between Malaysian Government Investment Issues (MGII) and Malaysian Government Securities (MGS) across benchmark tenors
- Constructed a monthly panel dataset from 2014–2024 to evaluate liquidity frictions, supply scarcity, primary-market demand, and Islamic investor demand
- Estimated Panel OLS models with tenor and year fixed effects, Newey-West HAC standard errors, robustness checks, VIF diagnostics, and residual analysis

**Confidence-Based OOD Detection and Risk-Aware Prediction in Image Classification** Grade: A

*Final Project, Intro to ML and Deep Learning, Dept. of Civil Engineering* *# AI accuracy # image classification # Gaussian Noise*

- Trained a ResNet18 classifier on CIFAR-10 and evaluated distribution-shift detection across SVHN, CIFAR-100, Gaussian noise, and rotated CIFAR images
- Compared maximum softmax confidence, logit margin, and negative energy scores using AUROC, FPR@95TPR, and AUPR
- Found that logit-based confidence signals can separate in-distribution and OOD samples, while calibration and risk-coverage analysis showed accuracy alone is insufficient for reliable prediction

## RESEARCH EXPERIENCE

**Research Assistant, Department of Economics, National Taiwan University** Jun 2024 – Dec 2024

- Conducted GIS-based spatial analysis of irrigation canal networks in southern Taiwan for an economic history research project
- Performed regression analysis in Stata to examine the relationship between infrastructure development and regional economic growth from 1960 to 1980; organized historical, geographic, and economic datasets to support empirical analysis and research documentation

**Research Assistant, Department of Psychology, National Taiwan University** Aug 2024 – Sep 2025

- Tackled procurements, managed **cash flow and reimbursements** for a social psychology lab
- Collected and formatted academic literature in APA **DOI citation format** for research purposes

## FORUMS

**Selected Student Presenter, Taiwan-Czech Geopolitical Forum, Charles University in Czech Republic** Nov 2026

- Selected through a competitive review process and awarded travel and accommodation funding to present my research
- Topic: *Resilience without Replication: Taiwan-Czech Semiconductor Cooperation under Europe's Pursuit of Strategic Autonomy*
- Examines how industrial interests, bilateral interactions, and institutional arrangements shape semiconductor cooperation between countries

## SKILLS

| | |
|---|---|
| Programming | Python, R, Stata, NumPy, pandas, scikit-learn, QGIS, Excel VBA |
| Machine Learning | Logistic Regression, Random Forest, ResNet18, Feature Engineering, Predictive Modeling, Out-of-Distribution Detection, Model Calibration, Risk-Coverage Analysis |
| Statistical Methods | Panel Data, Fixed-Effects Regression, Newey-West HAC Standard Errors, Robustness Checks, VIF Diagnostics |
| Data Visualization | Matplotlib, Seaborn, Tableau, SQL |
| Finance | Financial Statement Analysis, Credit Analysis, Fixed-Income Analysis, DCF Modeling |

## PROFESSIONAL EXPERIENCES

**Corporate Banking Intern, OCBC Bank, Singapore** Jun 2026 – Sep 2026

- Prepared financial spreading and collected market, client, and industry information for existing clients and prospects.
- Assisted business bankers and relationship managers in preparing AML/CFT reports, credit proposals, credit reviews and other projects
- Supported corporate credit analysis, client due diligence, financial statement review, and the preparation of banking documentation

**Accounting Intern, Good Finance Securities** Jun 2025 - Aug 2025

- Reconciled and analyzed post-trade transactions across multiple brokerage accounts using Excel VBA, improving reporting accuracy and operational efficiency; assisted in monthly financial closing and quarterly financial statement verification to ensure consistency with accounting records and regulatory reporting

## AWARDS & LEADERSHIP

**National Second Prize, CGU Business Competition, Team Leader** Jul 2023 – Aug 2023

- Led a team in developing a business proposal focusing on market feasibility, consumer behavior, competitor analysis, and product strategy

## TEACHING

**Teaching Assistant, A General Course on Religions and Metaphysics, National Taiwan University** 2025 Fall - Present

- Graded essay-based examinations and term papers for over 200 students across three consecutive semesters
- Assisted with course administration, student communication, and assessment consistency

**Teaching Assistant, Arab and Islamic Civilizations, National Taiwan University** 2024 Fall

- Assisted a visiting professor from Kuwait in an English-taught course and graded examinations and term papers
